

OCM[®]

SLUDGE THICKENING

DRUM THICKENER

Drum thickeners OCM are able to thicken organic and inorganic sludges.
AISI 304 or 316 stainless steel construction.
They have low power consumption as well as low polyelectrolyte consumption.
Moreover they are able to assure high thickening efficiency and easy maintenance.

Thanks to continuous research, our drum thickeners can reach high delivery and high dry solids contents in the thickened sludge.

Size: Drum diameter from 700 up to 1400 mm

Model: BR line
